

TERM SHEET

LIMPID FUND

The Fund consists of three sub-portfolios, each with its own distinct and complementary investment strategy. The foundation of these investment strategies is the fruit of several decades' worth of university research and the experience acquired during a number of financial crises. The combination of these three strategies into one fund is the innovative aspect of this Fund's risk management. The Fund's objective is to exceed the performance of comparable funds by a few percentage points and be less sensitive to market downturns during major corrections. To do this, the Fund will invest in three portfolio strategies made up of equities, but whose management philosophy will all rigorously follow the fundamental and technical economic trends, and whose goal will be to reduce share allocations when those trends are negative. The long positions in equities may be as low as 30% and 70% in income and/or alternative investments, which could play a compensatory role during strong market downturns. The Fund offers high added value in terms of the risk/return ratio compared to traditional balanced funds that are offered to Canadian investors.
